

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS
Coorg Institute of Dental Sciences

Cons Endo day by was observed by conducting a Talk for the 2nd and 3rd BDS students on the significance of our speciality and emphasising on the major role we play in general dentistry.

The patients reporting to the college were also educated about the various options available to save their natural teeth. We conducted the following competitions for UG students;

- 1) Pictionary
- 2) Poster making
- 3) Logo designing.

The enthusiasm of the students was so palpable; especially in Logo designing we could see their creativity, in Poster making we observed their understanding of various topics & how these posters could be used to educate patients. Pictionary showed how signs & symbols could be used to decipher words.
